TRI-AGENCY POLICY

The objective of this policy is to **improve access** to the results of Agency-funded research, and to **increase the dissemination and exchange of research results**. All researchers, regardless of funding support, are encouraged to adhere to this policy.

Tri-Agency Open Access Policy on Publications

<http://www.science.gc.ca/default.asp?lang=En&n=F6765465-1>

PUBLIC FUNDS = PUBLIC RESULTS

DISCOVER · ACHIEVE · BELONG

OPTION ONE: GREEN OPEN ACCESS

Publish your research in a journal of your choice, then deposit a version of your article in an open access repository, either one specialized for your discipline or one run by your institution such as [WinnSpace](#).

Public Domain icons from the Noun Project

OPTION TWO: **GOLD** OPEN ACCESS

Publish your research in either a hybrid (which offers both subscription and OA articles) or a fully Open Access journal.

WHAT DO YOU WANT FROM A PUBLISHER?

WHAT DO I WANT FROM A PUBLISHER?

- Professionally **edited** and **reviewed** for errors
- Considered **trustworthy** by researchers
- **Indexed** and **archived** so it is discoverable by others in the field
- My research is alongside **similarly high quality** research

BEALL'S CONTROVERSIAL LIST

NATURE | NEWS

Pay-to-view blacklist of predatory journals set to launch

Private firm says its watchlist of untrustworthy journals will be objective and transparent — but not free.

Andrew Silver

 Follow

Frontiers being added to Beall's list reveals the big weakness of Beall's list: It's not based on solid data, but on Beall's intuition.

LOW QUALITY PUBLISHERS

- “Predatory” or “Fraudulent” publishers charge fees, but do not provide the services: peer review, editorial services etc.

SAME NAME, DIFFERENT GAME

Intentionally use familiar/generic sounding names:

- Computer Science Chronicle
- Computer Science Journal
- European Journal of Advanced Computer Science
- International Journal of Advanced Research in Computer Science & Technology

****Sometimes have the exact same name as reputable journals** - Journal of Mathematical Sciences**

LOOK FOR:

- Websites that target authors, rather than readers
- Aggressive solicitation - ANY time you are told not to tell anyone or it will risk the deal
- Asks for manuscripts to be submitted by email

Public Domain icons from the Noun Project

LOOK FOR:

- Promises quick turnaround and publication
- No information on how content will be preserved
- Low OR high APC*
- No description of publishing process

Public Domain icons from the Noun Project

PUBLISHING PROCESS

- Is there an editorial board?
- Who is on the editorial board?
 - Did they have to pay to be on it?
- How fast do they conduct peer review?
 - If the answer is in 7 days or less, that is generally bad
- Do they have a retraction policy?

EASY WAYS TO VERIFY

- Ask me!
- Wikipedia usually has good coverage of publishers
- look up editorial board - do *they* list involvement?
- contact named editors if in doubt
- look up in various indexing/ ranking sites:
 - Scopus <https://journalmetrics.scopus.com/> ,
 - Ulrich'sWeb <http://libguides.uwinnipeg.ca/az.php?a=u> ,
 - Journal Guide <https://www.journalguide.com/>
 - DOAJ <https://doaj.org/>
 - Your University's Title List

PUBLICATION COSTS

- APCs
- Image Charges
- Rights Clearances

AUTHOR'S RIGHTS

DISCOVER · ACHIEVE · BELONG

WHAT ARE YOUR COPYRIGHT(S)

PROTECTING YOUR RIGHTS

Authors have the ability to negotiate their publishing contracts and ask to retain some or all of their rights

EXERCISE YOUR RIGHTS

- Archive a copy of your work
- Increase the work's visibility and citation impact
- Get a persistent URL (handle)
- Fulfill grant funding requirements
- Library assistance on metadata and discoverability
